SATVINDER SINGH

Peterborough, ON | (548) 468-5550 | satvinder.singh2215@gmail.com | linkedin.com/in/satvindersingh2215

PROFESSIONAL SUMMARY

Entry-level IT and networking professional with a Wireless Information Networking diploma from Fleming College and a Bachelor of Computer Applications. Hands-on experience configuring routing and switching, wireless networks, and IoT systems, plus a team capstone that delivered a sponsor-facing e-learning web platform. Skilled in Python and cloud computing concepts; Eager to support network technician and IT support teams with hands-on troubleshooting and configuration.

TECHNICAL SKILLS

Networking: TCP/IP, subnetting, OSPF, EIGRP, VLANs, DHCP, DNS, routing and switching, wireless networking, mesh networking

Security: Firewalls, access control lists, wireless network security, network monitoring, Wireshark traffic analysis

Programming & Cloud: Python, shell scripting, cloud computing and datacenter concepts

Systems & Hardware: Linux (Ubuntu), Windows 10/11 administration, Cisco Packet Tracer, Raspberry Pi, Arduino, microcontrollers, sensors, routers, switches, wireless access points

Project Practices: Requirements gathering with sponsors, backlog management (MoSCoW prioritization, sprint planning), team collaboration

PROJECTS

Dalhousie House E-Learning Program Fleming College, 2025

Applied Projects I & II Capstone | Team of 4 | Sponsor: Dalhousie House

- Built a client-facing e-learning web platform through sponsor requirement sessions, managing the team backlog of user stories, tasks, and sprints
- Developed admin portal features for adding users, assigning users to courses, and editing course content
- Implemented account security, including password setup, email-based password recovery, and authentication
- Developed a searchable training materials library, search bar navigation, and a "Recently Viewed" section
- Developing a learner progress dashboard with visual indicators, deadline reminders, and usability features such as tooltips and a help/FAQ section

IoT Network Monitoring System Fleming College, 2025

- Designed and built a Raspberry Pi-based network monitoring system to detect connectivity issues and track performance metrics in real time
- Integrated shell scripts and monitoring tools to automate diagnostics and surface actionable system insights
- Applied networking knowledge to identify, troubleshoot, and resolve network anomalies as they occurred

EXPERIENCE

Retail Customer Service Representative May 2024 – October 2026

Circle K | Peterborough, ON

- Coordinated the duties and tasks of gas station attendants to keep daily operations running smoothly
- Resolved customer complaints quickly and effectively, maintaining a positive customer experience
- Managed pricing for all new inventory
- Trained new staff on store procedures and policies
- Ensured store procedures and policies were followed consistently
- Followed municipal and provincial policies for gas spill response

EDUCATION

Wireless Information Networking (WIN) Diploma 2023 – 2025

Fleming College | Peterborough, ON

Networking & Routing: Introduction to Networks; Switching, Routing and Wireless Essentials; Mesh Networking; Enterprise Networking, Security and Automation

Wireless: Wireless Communication Systems; Emerging Wireless Technologies; Advanced Wireless Security; Wireless Network Security; Radio Frequency Theory; Broadcast Technology; Digital Signal Processing

Security: Introduction to CyberSecurity

IoT, Cloud & Systems: Internet of Things; Smart Grid SCADA; Datacenter Cloud Computing; Interfacing; Advanced Operating Systems (Unix); Electronics; Data Mining

Project & Business: Applied Projects I & II; Advanced Managing Technical Projects; Entrepreneurship Skills in Technology

Bachelor of Computer Applications (BCA)
CBLU University

Programming: C Programming; Object-Oriented Programming using C++; Object Technologies & Programming using Java; Visual Basic; Computer & Programming Fundamentals; Web Designing

Data & Systems: Data Structures I & II; Introduction to Database System; Introduction to Operating System; Logical Organization of Computer I & II; Structured System Analysis and Design; Software Engineering

Networking & Internet: Data Communication and Networking; Introduction to Net; E-Commerce; Management Information System

Other: Mathematics; Mathematical Foundations of Computer Science; Artificial Intelligence; Computer Graphics; PC Software; Communication Skills (English); Environmental Studies

Practical labs: C, SQL, HTML, C++, Java, and .NET
